

CLAMP CONNECTOR

Taper-Lok® is a world leader in engineered connection systems. From the simple to the most extreme environments, Taper-Lok® has provided over 40-years of leak free operation in a wide range of industries including offshore/onshore oil and gas, refining, chemical and cryogenic services.

■ The clear choice for your connection needs

When weight and space are critical, turn to the reliability of the Taper-Lok® Clamp Connector, by Taper-Lok®, a leader in leak free, engineered connection systems for over 40 years.

As an alternative solution to traditional flanges, the Taper-Lok® Clamp Connector provides a smaller size, lighter weight option for quick and easy installation.

Taper-Lok® Clamp Connector Benefits

- Gas-tight, self-energized, reusable sealing technology
- 360° contact sealing surface
- Quick and easy assembly, with only 4 radially aligned bolts
- Reduced size and weight over traditional ANSI flanges
- Performs under rugged conditions in a variety of applications

www.taper-lok.com

Applications

- Appropriate for a wide variety of low- and high-pressure applications
- From benign to highly corrosive applications
- Oil & Gas production both Onshore and Offshore
- Refining
- Chemical and Petrochemical
- Desalination
- Food Processing

Advantages

- A variety of configurations (hubs, blinds, transitional seal ring, hub-o-let, etc.)
- Wide range of materials (carbon steel, stainless steel and exotics)
- Up to 24" NPS with custom engineered solutions available
- Quick delivery and turnaround

Custom Engineered Connection Solutions

Taper-Lok's® in-house engineering and manufacturing departments will work with you to design and support the integration of Taper-Lok® products into your new or existing projects.

Taper-Lok® products can be used in any application requiring a leak free solution. Let the Taper-Lok® engineers work with your engineering and manufacturing departments to design custom solutions to meet your most challenging connection requirements.

Taper-Lok® offers:

- In-house engineering
- Full-service in-house manufacturing from forging, heat treating, finish machining, welding, assembly and testing
- Turnkey solutions
